ESUBALEW WORKU

Full-Stack JavaScript Developer | Software Engineering Student

Bahir Dar, Ethiopia | esuwo2024@gmail.com | github.com/esubaleww | linkedin.com/in/esuk | esubalewworku.vercel.app

Professional Summary

Fifth-year Software Engineering student at Bahir Dar University (graduating 2027) who builds full-stack web applications with React, Node.js, Express, and MongoDB. Designed and built the backend of an institutional service-management portal during a four-month internship with the Amhara Regional State Innovation and Technology Bureau. First-place winner at the OpenAI DevDay Exchange Community Hackathon (Bahir Dar, 2026). Interested in accessible, community-focused software and applied AI, including voice tools for Ethiopian farmers.

Technical Skills

Core: JavaScript, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, role-based access control

Tools: Git, GitHub, Postman, Tailwind CSS, deployment (Vercel, Render), Stripe API integration

Familiar with: Python (Jupyter, introductory machine learning), Java, C++

Experience

Full-Stack Developer Intern | Amhara National Regional State Innovation and Technology Bureau (ITB) — Feb–May 2026

- Designed and built the backend of the Innovation and Technology Service Management System (ITSMS), a MERN-stack portal for bureau information, program applications, technology-service requests, and staff workflows.
- Implemented the REST API, business logic, JWT authentication, and role-based access for public users and staff.
- Worked with the project team on requirements and end-to-end application flows; wrote testing and technical documentation.

Virtual Internships (Full-Stack and Front-End) | Future Interns, Codveda Overseas Solutions, SaiKet Systems — Nov 2025–Feb 2026

- Built REST endpoints with JWT authentication and connected them to responsive React interfaces through API integration.
- Built a responsive product landing page using semantic HTML, CSS, and JavaScript, and delivered all work through public GitHub repositories against task milestones.

Selected Projects

Innovation & Technology Service Management System (ITSMS) | React, Node.js, Express, MongoDB — 2026

- Institutional portal for public information, program applications, service requests, and staff workflows, built during my ITB internship.
- Repository: github.com/esubaleww/itsms-project

MERN ChatApp | React, Node.js, Express, MongoDB — Deployed

- Full-stack chat application with user authentication and messaging, deployed with the frontend on Vercel and the backend on Render.
- Live: chatapp-three-vert.vercel.app | Repository: github.com/esubaleww/CHATAPP

E-commerce App | Full-stack, Stripe

- Online shopping application with product browsing and a Stripe payment checkout flow.
- Repository: github.com/esubaleww/E-COMMERCE-APP

Zinab: Voice AI for Agriculture | Innovation project — In development

- Designing a multilingual voice-and-text assistant to give Ethiopian farmers access to local weather, satellite, and soil information in Amharic, Afaan Oromo, and English.

Other: Church Resources Library (web app for organizing and sharing community materials, github.com/esubaleww/church_resources_library) and Spam Detection (Python and Jupyter, github.com/esubaleww/Spam-Detection-Web-App).

Education

BSc in Software Engineering | Bahir Dar University, Ethiopia — Expected graduation 2027

Certifications

- freeCodeCamp: Front End Development Libraries
- freeCodeCamp: Back End Development and APIs

Achievement

- **First-place team winner, OpenAI DevDay Exchange Community Hackathon**, Bahir Dar, October 2026. Built the frontend of the team's Automated Traffic Management System.
